PRESS RELEASE

Multiple stars for DODONI at the Superior Taste Awards 2020

New distinctions for 4 company products from the International Taste Institute (iTQi)

The DODONI dairy industry once again stood out at the internationally recognised Superior Taste Awards, earning prizes for the outstanding taste of four of its products.

Consistently investing in the production of quality products made with 100% Greek milk, DODONI earned 3 gold stars at this year's competition for the DODONI Lactose-free yoghurt, available in foreign markets; 2 gold stars for the DODONI Sheep's yoghurt and the recently launched DODONI Goat's yoghurt; and 1 gold star for the DODONI TouTost semi-hard sandwich cheese.

These new awards once again demonstrate DODONI's dedication to producing dairy products of excellent quality and superior flavour which bring the Taste of Good to the tables of Greek and foreign consumers in more than 50 countries around the world.

The Superior Taste Awards are sponsored by the International Taste Institute (iTQi) with the aim of highlighting foods and beverages of outstanding quality and flavour worldwide, through an impartial "blind test tasting" process involving 120 leading chefs and tasters.

DODONI Deputy CEO Michalis Panagiotakis said: "The fact that our products are consistently recognised for their excellent quality and authentic flavour by reputable institutions such as the iTQi Superior Taste Awards is a great honour and recognition for the DODONI family. We are true to our vision and continue to put into practice our philosophy of representing the 'Taste of Good' by producing top-quality dairy products only from 100% Greek milk. We owe many thanks to our people, who with love and attention make sure our pure products meet the strictest quality standards, and to the consumers who recognise the unique characteristics of DODONI products and select them daily."
